

# Cardiac MRI

**Target group:** Radiologists/ Radiographers

**On completion of the course you will be able to:**

- Understand the concepts of cardiac MRI
- Recognize the anatomy of the heart
- Understand the different techniques used in cardiac MRI Imaging

**Content:**

- Cardiac MRI technique
- Physics you need to know
  - Cardiac MRI anatomy
  - Clinical applications
  - Imaging in cardiac ischemia (perfusion-, stress- and viability imaging)
  - Delayed enhancement imaging
  - Velocity mapping
