

Community Based Rehabilitation: early intervention of Communication development

Target group: Speech therapists

On completion of the course you will be able to:

Offer treatment to individual children. Therefore it is more important to involve the parents, family, day care workers or teachers in the communication development of the child.

Content:

- Making a group program
- Information concerning: normal communication development / interaction.
- How do you teach parents, family and teachers?
- Observation of the children's communication (needs and level)
- Add language on the level of the child
- How to create daily situations, plays and music on the level of the child
- There is a mix between theory and hands on skills.
