

# Quality Enhancement in CT Imaging

**Target group:** Radiologists/ Radiographers

**On completion of the course you will be able to:**

- Understand the principles related to CT
- Use accurate scanning protocols
- Choose an accurate injection rate of contrast media and scanning delay
- Recognize image artefacts
- Give an indication of radiation dose
- Recognize cross sectional anatomy

**Content:**

Principles related to CT  
Image formation  
Scanning protocols  
Contrast media  
Image artefacts  
Radiation safety  
Cross-sectional anatomy
